

BIZPILOT_FINAL_EXECUTION_AND_VALIDATION_PRIORITY_ST

Date: 2026-06-01

Status: Active Priority Override Standard

Purpose: Final execution order for BizPilot before first real pilot validation.

Executive Decision

BizPilot does not require a strategic reset.

The product direction remains:

BizPilot
=
Lead Recovery & Response System
for cleaning businesses.

Core workflow:

Public Quote Intake
→ Lead Organization
→ AI Summary
→ AI Draft
→ Owner Review
→ Manual Response

The primary risk is no longer infrastructure readiness.

The primary risk is:

Product Readiness
+
Demo Readiness
+
Customer Validation

Current State

Infrastructure

Status:

Production Ready Foundation

Completed:

- Auth
- Custom SMTP
- Email Confirmation
- Password Reset
- Production Deployment
- Domain/DNS
- Backup Proof
- Restore Proof
- DB-Level Recovery Proof
- Security Baseline
- Manual-Only Pilot Decision

Product

Status:

Needs Final Polish

Main concerns:

- Homepage quality
- Dashboard quality
- Lead workspace polish
- Email template quality
- Demo readiness
- Founder confidence

Readiness Layers

BizPilot readiness must be evaluated in four separate layers.

Layer 1 — Infrastructure Readiness

Includes:

- Auth
- SMTP
- Deployments
- Database
- Backup
- Restore
- Security
- DNS

Current status:

Mostly complete

Layer 2 — Product Readiness

Includes:

- Homepage
- Dashboard
- Lead Workspace
- Lead Detail
- Email Templates
- Empty States
- Loading States
- Error States

Current status:

Incomplete

Must be completed before outreach.

Layer 3 — Demo Readiness

Includes:

- End-to-end smoke
- Demo scenario

- Demo script
- Demo video

Current status:

Not complete

Layer 4 — Market Validation

Includes:

- Outreach
- Demo calls
- Pilot conversations
- First pilot customers

Current status:

Not started

Phase Structure

Phase 24F

Final No-Secret Production Smoke

Priority:

P0

Requirements:

- Public routes
- Auth routes
- Dashboard routes
- Lead workflow
- AI workflow

- Password reset
- Email confirmation

Evidence must be sanitized.

Never record:

- Secrets
- Tokens
- Passwords
- Customer data
- Provider output

Phase 24G

Explicit Owner Approval

Priority:

P0

Must record:

- Date
- Approver
- Scope
- Pilot constraints

Before real customer data.

Product Readiness Sprint

Priority:

Highest Product Priority

Complete before outreach.

Homepage

Review:

- Positioning
- Trust
- Clarity
- CTA
- Cleaning focus

Goal:

30-second understanding

Dashboard

Review:

- Layout
- Density
- Clarity
- Owner workflow
- Queue usability

Goal:

60-second first value

Lead Workspace

Review:

- Lead detail
- AI summary
- AI draft
- Follow-up flow

Goal:

Owner can act immediately

Email Templates

Create:

- Initial reply
- Follow-up
- Re-engagement

Requirements:

- Manual send only
 - No auto-send
 - No automation
-

Empty States

Review:

- Dashboard
- Leads
- AI panels

Goal:

No dead screens

Error States

Review:

- Auth
- AI
- Lead intake
- Dashboard actions

Goal:

Professional failure experience

Demo Readiness Sprint

Priority:

Before outreach

End-to-End Smoke

Run:

Signup
→ Verify Email
→ Login
→ Create Business
→ Submit Lead
→ Dashboard
→ AI Summary
→ AI Draft
→ Copy Reply
→ Logout
→ Password Reset
→ Login Again

Record results.

Demo Scenario

Duration:

3-5 minutes

Flow:

Lead arrives
→ Dashboard
→ AI Summary
→ AI Draft

- Manual Review
- Manual Response

Demo Video

Duration:

60-120 seconds

Structure:

- Problem
- Lost Lead
 - BizPilot
 - Faster Response
 - Call To Action

Customer Validation Sprint

Priority:

Before Feature Expansion

Outreach Target

Initial target:

20-30 cleaning businesses

Sources:

- Google Maps
- Websites
- Facebook
- Instagram
- LinkedIn

Founder-Led Outreach

Preferred:

- Email
- DM
- Demo Call

Not preferred:

- Paid Ads
 - SEO
 - Large Content Campaigns
-

Pilot Rules

Pilot remains:

Manual Only

Allowed:

- Manual dashboard review
- AI draft generation
- Manual copy/send

Not allowed:

- Auto-send
 - SMS automation
 - WhatsApp automation
 - Booking
 - Invoicing
 - CRM expansion
-

P1 After Validation

Only after real validation evidence.

Includes:

- Owner Notes
 - Source Attribution
 - Validation Dashboard
 - Payment Process
 - Support Process
 - French Pilot Expansion
 - Strict Restored App/RLS Proof
-

P2 Hardening

Includes:

- IP Hash Salt
 - Abuse Retention Cleanup
 - Privacy Registers
 - Security Registers
 - CSP Hardening
 - Node Runtime Enforcement
 - Workflow Cleanup
 - Header Cleanup
-

P3 Future Scope

Do not build before validation.

Includes:

- Owner Notification Email
 - Customer Email Automation
 - SMS
 - WhatsApp
 - Booking Engine
 - Invoices
 - Billing Automation
 - Calendar Sync
 - Multi-Vertical Expansion
 - Full CRM
 - Autonomous AI
-

Validation Override Rule

Highest Priority Rule:

If a task does not directly improve:

- Real-data readiness
- Product readiness
- Demo readiness
- Customer validation

then it may not take priority over:

1. Homepage Polish
2. Dashboard Polish
3. Email Templates
4. End-to-End Smoke Test
5. Demo Creation
6. Demo Video
7. Customer Outreach

Feature expansion is forbidden until validation evidence exists.

Final Strategic Statement

Current BizPilot objective is no longer:

Can we build it?

Current BizPilot objective is:

Will real cleaning businesses use it?

Every priority decision must be evaluated through that lens.
